

Sharon Day Maths

Mathematics Across the Curriculum

*Hosted by Eldwick Primary School and led by Sharon Day
2018 – 2019*

Mathematics is not just a stand-alone subject. It is full of interconnected ideas and concepts. It also underpins many other areas of the curriculum. To make maths meaningful, children need to be able to connect different mathematical ideas together as well as to connect these ideas and concepts across the whole curriculum. This course will equip you with:

- ✓ understanding the connectivity of mathematical ideas, concepts and procedures
- ✓ finding the maths in all situations
- ✓ linking other subjects into maths lessons

Ideas for meaningful learning experiences and activities will be given to the delegates. It is aimed at teachers of all year groups from year 1 to year 6.

| Sessions | Maths links to: | Date | Time |
|-----------|----------------------------|----------------------------------|-----------------|
