

Maths Links with Creative Subjects

Hosted at Dial House, Laycock

Led by Sharon Day of SharonDayMaths Ltd.

Linking subjects helps to ensure that pupils see meaning in what they are learning. Children who might not enjoy mathematics may find enjoyment when it is linked with other subjects in which they experience success. Ensuring that a broad and balanced curriculum is linked with maths, ensures that there is a broader development in the children, enabling them to develop and discover their interests and talents whilst, at the same time, being able to rehearse and apply skills and knowledge from the mathematics curriculum.

The aim of session 1 is to support the Maths and Art & Design subject leaders with finding and utilising links between their subjects. The aim of session 2 is to support the Maths and Music subject leaders with finding and utilising links between their subjects. The aim of session 3 is to support the Maths and Design & Technology subject leaders with finding and utilising links between their subjects.

It is recommended, although not essential, that the subject leaders for maths and the other areas of the curriculum attend together.
